

Technical drawing of the Remote Driver Installation, showing three views: Top View, Front View, and a side view of the driver assembly.

Top View: Shows the driver assembly tilted at a maximum angle of 22.5° Max.

Front View: Shows the driver assembly mounted to the ceiling. Key dimensions include:

- Distance from ceiling to the top of the driver assembly: 14.5cm
- Distance from the top of the driver assembly to the center of the lens: 1.3cm
- Distance from the center of the lens to the center of the lens: 12.4cm
- Distance from the center of the lens to the center of the lens: 2.5cm
- Distance from the center of the lens to the center of the lens: 40.6cm
- Distance from the center of the lens to the center of the lens: 1.9cm
- Distance from the center of the lens to the center of the lens: 2.7cm
- Distance from the center of the lens to the center of the lens: 20.3cm
- Distance from the center of the lens to the center of the lens: 1.0cm
- Distance from the center of the lens to the center of the lens: 40.6cm
- Distance from the center of the lens to the center of the lens: 15.2cm
- Distance from the center of the lens to the center of the lens: 7.6cm
- Total height from ceiling to the bottom of the driver assembly: 122.9cm

Side View: Shows the driver assembly mounted to the ceiling, with a label "Remote Driver Installation" and a dimension of 14.5cm from the ceiling to the top of the driver assembly.
